NEWS FROM THE TIMBERZOO JANUARY – MARCH 2006

Post stocks. Ironbark 250x300mm sections from Brisbane wharves are a recent addition to our range. There is a good supply in lengths 4.5m to 5.0m plus – most in excellent condition. Looking for a good owner are stocks of 150mm sq **jarrah**, 170x120mm and 220x150mm **stringybark** and 280x95mm **brushbox** and **ironbark**. **Turpentine** 270mm square posts are priced to clear at \$100/mtr.

SPECIALS

This year we have limited supplies of Natural Feature Grade north coast species. If you anticipate myriad gum lines, you will be surprised— because some of the species listed next don't exhibit this type of feature. They are so graded because of tanin-marked insect trails — a regular 'blemish' in all eucalypts. Is this a visible 'defect' or just a reminder of the living diversity of our eucalypt forests? It is all in the eye and mind of the beholder. Although we can guarantee these prices for the next few months, stocks are limited, so don't leave orders till the last minute

Grey Ironbark KD 130x19mm NFG	\$66.00/m2
Tallowood KD 130x19mm NFG	\$59.00/m2
NSW Spotted Gum KD 130x19mm NFG	\$59.00/m2
North coast Forest Reds KD 130x19mm NFG	\$55.00/m2

REASON #3 TO CHECK THE WEBSITE !!

Folk can spend a lot of unnecessary time (and therefore money) fixing **Wharfdeck** to subfloor joists. Wharfdeck boards 140x32mm will span 800mm joist centres if required, but the number of screw fixings involved can still be considerable and the task, time-consuming.

The [Wharfdeck Information Sheet](#) on our 'Timber Information' page has plenty of handy tips on installation. One is that you set joist centres at 600mm and only fix every second joist. This is a tested method of fixing which also eliminates the 'clutter' of screw heads on the finished surface.
