

**NEWS FROM THE TIMBERZOO
FEBRUARY ¾ MARCH, 2007**

Decking

'Tis the decking season and it is worth knowing why we carry the particular species we advertise below. Yes — they are durable class 1 or class 2 timbers without the price premium of ironbarks and company. In addition they lack penetrating gum pockets or surface weakness found in some other class 2s — and length! Average pack length is reliably long - 3.0m to 4.0m and not an excessive quantity of docked lengths within a random-length pack. We do attempt to supply a regular quantity of recycled timber in decking profile. However there are difficulties in making available a wide range of recycled options for exterior applications. To read more on the subject, visit the [Timber Info](#) page on our website.

Yellow Stringybark	85x19mm	\$49.00/m ²
Forest Red Gum	85x19mm	\$59.00/m ²
Spotted Gum	85x19mm	\$59.00/m ²

Hot from the Outfeed ¾ Latest Production Run

Recycled Messmate Overlay 80x12mm \$42.00/m². Solid Timber at a great price! For larger houselots 100m² +, see us for a pack price on this great product. Have you purchased 12mm overlay before? Worried about board length? Understandably so. It's generally a big shock when consumers open a pack of KD overlay and the reality of 600mm to 1200mm board length sets in. But don't worry! Our average board length exceeds 3.0m.

Recycled Gippsland Reds 120x19mm; 120x12mm \$69.00/m²; \$59.00/m²
Remilled recycled purlin from a Notting Hill factory, these seasoned timbers include Red Ironbark, Mountain Grey Gum and Southern Mahogany. Not the dark plum tones of jarrah, but rather the bruised pinks, ripe cherry, salmon greys and blackcurrant reds of these southern species — intensified by the oxidation of age, tattooed by black speck and errant carbon markings which remember when metal once held timber to a truss.

Dressed Recycled Beams ¾ Outdoor Structures

DAR Stringybark	185x85mm	\$80.00/m	4.2s
DAR Blackbutt	185x85mm	\$90.00/m	4.5m to 6.0m
DAR Kauri Pine	260x55mm; 185x55mm		Great furniture or benchtop timber 3.0m to 4.0m

Wide 180mm T&G boards in North Coast Hardwoods

Timberzoo can supply limited stocks of kiln-dried **Ironbark, Spotted Gum, Grey Gum, Blackbutt** and **Tallowwood** in a grade which includes natural features - knot, black speck, hobnail (see [Timber Info](#) page on website for photo glossary of terms) and mill features such as minimal planer miss, chipping, minor bruising and fine to medium checking in otherwise clear boards. We call it Mill-Feature Grade and it has a high proportion of 3.0m to 4.0m boards with end-matching. There is usually less than 200m² of any one species available at any one time - so do not delay. Orders can be placed for future supply if stocks temporarily short. \$79.00 to \$85.00/m².
